Eurus Energy Europe BV awarded the Technical Operations Agreement to OutSmart Nederland BV

Independent Energy Asset Expert company collaborates with the Eurus Asset Management team in the Netherlands.

OutSmart announced today that it has been awarded for the provision of the Technical Operation Management Services for a large part of Eurus Dutch Onshore Windfarm portfolio.

Eurus Energy Europe, a global developer and investor in wind energy, has a rapidly growing portfolio in the Netherlands of onshore wind farms. Eurus own asset management team lead by Mr. J. Carrero is being established and a local partner provides the daily operations management. The daily operations management makes sure that the HSE compliancy, PPA coordination, Alarm handling, contract management support and reporting is fulfilled for the portfolio and towards the stakeholders of the wind farms.

“OutSmart works close together with Eurus asset management team, so the Eurus Asset management model is respected, with the addition of the local operational excellence of OutSmart” as stated by managing director Dennis Schiricke.

“Eurus is pleased to have the collaboration of an experienced company like OutSmart to operate our wind farms in the Netherlands. I firmly believe it will be the beginning of a long and fruitful business relationship towards the achievement of a common goal of efficiency and maximum commitment to our projects” as stated by Head of Asset Management Javier Carrero

About OutSmart

OutSmart, since 2008 active in the renewable energy sector, acts as frontrunner in the energy transition. The company is known and being asked for its “Power of Predictability”, meaning the ability to predict accurately in a pro-active and transparent way of collaboration and innovative solutions. OutSmart works for investors, owners, fund managers of renewable production assets (like wind- and solar parks and biomass power plants) and for industrial off-takers of energy. The company has a lean and mean organization with 45 employees, who are each specialist in their professional discipline. It operates from three countries: The Netherlands, Germany, and the UK. As a member of the Deutsche Windtechnik Group, they work close together on technical solutions for wind turbines.
